# MISHUK ADHIKARI

**Lead Software Engineer | Cloud Platforms | Backend Systems | Agentic AI**

Dhaka, Bangladesh | mishuk.me | github.com/MishukAdhikari | linkedin.com/in/mishuk-adhikari

## PROFILE

Lead software engineer with 8+ years across PHP, Laravel, WordPress, cloud hosting, infrastructure automation and developer tooling. Leads engineering for xCloud, a multi-cloud platform serving 100,000+ websites. Specializes in API architecture, billing systems, Linux operations, multi-provider provisioning and production AI agents.

## CORE ENGINEERING

| | |
|---|---|
| **Backend & APIs** | PHP, Laravel, Symfony, REST/SOAP, OAuth2, scoped authorization, OpenAPI |
| **Cloud & Platform** | AWS, DigitalOcean, GCP, Vultr, Hetzner, Linode/Akamai; provisioning and lifecycle |
| **Infrastructure** | Ubuntu, Nginx, OpenLiteSpeed, PHP-FPM, MySQL/MariaDB, Redis, systemd, TLS, DNS, Docker |
| **Frontend & Tooling** | Vue.js, TypeScript, JavaScript, Inertia, Node.js CLI, GitHub Actions |
| **Leadership** | Architecture, code review, mentoring, releases, incident investigation, cross-team delivery |

## PROFESSIONAL EXPERIENCE

### Startise / xCloud | Lead Engineer

*Dhaka, Bangladesh | Oct 2021 - Present*

- Lead 8+ engineers across backend, platform and product delivery, including architecture, reviews, releases and production reliability.
- Designed multi-cloud provisioning abstractions for create, resize, rebuild, capacity handling and teardown across major providers.
- Built public, partner and enterprise APIs with scoped tokens, endpoint-level authorization, pagination policy and OpenAPI contracts.
- Owned complex billing and subscription workflows covering prorations, renewals, cancellations, invoices, legacy plans and payment-state edge cases.
- Led Laravel, PHP and Nova upgrades while maintaining production compatibility across a large managed hosting fleet.
- Built AI-assisted engineering workflows including Pro Engineer and Agent Bridge for scoped, audited, read-only investigation.

### WPDeveloper | Software Engineer

*Dhaka, Bangladesh | Sep 2019 - Sep 2021*

- Built product features using PHP, Laravel, Vue.js, Alpine.js and JavaScript.
- Developed a Vue/PHP video-builder and worked on automation, scraping, payment gateways, third-party integrations and deployment tooling.

### SearchWorxx | Backend Engineer, Remote

*Jun 2018 - Aug 2019*

- Developed PHP backend services, REST/SOAP integrations, web scrapers and service-migration tooling for distributed remote projects.

### Repto Education Center | Software Engineer

*Dhaka, Bangladesh | Sep 2017 - May 2018*

- Started professional software career building WordPress plugins and frontend applications with PHP, JavaScript, Vue 2, jQuery, HTML and CSS.

## SELECTED ENGINEERING WORK

**xCloud Platform:** Multi-cloud hosting and server-management platform serving 100,000+ websites; ownership spans provisioning, APIs, billing, authentication, backups, domains, deployments and operations.

**Pro Engineer:** Built a Slack-based AI support-engineering assistant; first-month usage reached 600+ assisted interactions with hundreds of thread investigations.

**Agent Bridge:** Designed a scoped, audited, read-only evidence layer for bounded server-side investigation without bypassing application permissions.

**Craft Mishuk / Billing Agent:** Built a read-only billing investigation agent over production data and Stripe to surface invoice anomalies and revenue-impacting defects with human approval.

**xCloud CLI & Terminal:** Expanded public/enterprise CLI coverage and implemented provider-agnostic terminal AI support for OpenRouter, OpenAI and Anthropic with diagnostics and secret redaction.

## OPEN SOURCE & PUBLIC ENGINEERING

- Laravel Telescope: merged upstream contribution adding slow-query detection support to IncomingEntry.
- Laravel Documentation: merged documentation contribution for slow-query filtering.
- WordPress: public plugins for weForms PDF export, Bitcoin price integration and WooCommerce product availability.
- Developer tooling: claude-chrome-guard for safer machine-specific browser and agent workflows.

## TECHNICAL STACK

**Languages:** PHP, JavaScript, TypeScript, SQL, Bash, Python

**Frameworks:** Laravel, Symfony, WordPress, WooCommerce, Vue.js, Inertia, Laravel Nova, Node.js

**Infrastructure:** Linux, Docker, Nginx, OpenLiteSpeed, MySQL, MariaDB, Redis, GitHub Actions, AWS, GCP, DigitalOcean, Vultr, Hetzner, Linode/Akamai

**AI Engineering:** agent workflows, tool use, read-only evidence layers, Slack automation, safety boundaries, OpenRouter/OpenAI/Anthropic

## EDUCATION

### National University | Bangladesh

Bachelor's degree, 2017 - 2022 | CGPA 3.03

## CAREER FOCUS

Remote or international senior/lead engineering roles in backend systems, cloud platforms, developer infrastructure, APIs and production agentic AI.
